1. The following is an examiner's statement of reasons for allowance: The use of a spiral inductor in combination with a signal line of the type having an inner conductor is not taught or suggested by the prior art of record because the planar configuration of the spiral inductor of the claimed invention differs from and offers advantages over the helical (coils) and toroidal (doughnut shaped) inductors known in the art (see teachings of Koss cited in the applicants information disclosure statement of 2-1-99). The use of the above mentioned inductor in a housing that also includes a surge blocking means or device is not taught or suggested by the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

2. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Stephen Jackson whose telephone number is (703) 308-2137.
